**RULE 1.47(a) PETITION TO FILE APPLICATION  
BY OTHER THAN INVENTOR**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

Pursuant to 37 C.F.R. § 1.47(a) and 35 U.S.C. § 118, Assignee submits this Petition seeking permission to file the above-identified patent application (hereinafter "the application") without the signature of the following inventor who has refused to execute the declaration for the application:

Alexander Buryak  
53 Coronga Crescent  
Killara, New South Wales, 2071  
AUSTRALIA

As set forth in further detail below, Assignee has made a *bona fide* attempt to present the application and corresponding Oath and Declaration to the inventor for signature.

The below-signed attorney, Andre Marais, is a patent attorney employed by the firm of Schwegman, Lundberg, Woessner & Kluth, P.A., which represents Bandwidth Foundry Pty Ltd. in the above-identified application.

This patent application pertains to technology developed by Mr. Alexander Buryak, Mr. Kazimir Kolossovski, and Mr. Dmitrii Yu Stepanov during and in the course and scope of employment by Bandwidth Foundry Pty Ltd. As such, Bandwidth Foundry Pty Ltd. submits that it has a proprietary interest in this application. Mr. Buryak was under a duty to cooperate in the preparation of the application and to assign the application to Bandwidth Foundry Pty Ltd. See *Solomons v. United States*, 137 U.S. 342, 346 (1890) ("If one is employed to devise or perfect an

instrument, or a means for accomplishing a prescribed result, he cannot, after successfully accomplishing the work for which he was employed, plead title thereto as against his employer. That which he has been employed and paid to accomplish becomes, when accomplished, the property of his employer. Whatever rights as an individual he may have had in and to his inventive powers, and that which they are able to accomplish, he has sold in advance to his employer).

Mr. Buryak is no longer employed by Bandwidth Foundry Pty Ltd. On or between August 25, 2005 and September 9, 2005, Assignment documents for the application and an accompanying Combined Declaration and Power of Attorney document were sent by Bandwidth Foundry Pty Ltd. to Mr. Buryak, as indicated by email correspondence between Mr. Buryak and Dr. Ian Mann, the Managing Director of Bandwidth Foundry Pty Ltd., on August 24, 2005, August 25, 2005, September 7, 2005, and September 9, 2005. Assignee has included a copy of these documents and emails. Mr. Buryak indicated receipt of the Assignment documents and the Combined Declaration and Power of Attorney document in a September 9, 2005 email addressed to Dr. Mann. Assignee has included a copy of this email. Mr. Buryak indicated that he would not cooperate with the prosecution of the above-identified application in a May 19, 2006 email, also addressed to Dr. Mann. Assignee has included a redacted copy of this email.

In support of this Petition, Assignee submits the Declaration under Rule 1.63 to fulfill one of the requirements. The Rule 1.63 Declaration has been executed by Dr. Ian Mann, the Managing Director of Bandwidth Foundry Pty Ltd., on behalf of the Assignee. Assignee has provided the requisite certification referred to in 37 C.F.R. §3.73 to allow Dr. Mann to sign the Rule 1.63 Declaration.

Assignee has also included a check for the required petition fee of \$200.00 under 37 C.F.R. § 1.17(g).

The Assignee has been unable to obtain the omitted inventor's signature on a Declaration pursuant to 37 C.F.R. § 1.65 for the above-identified application. Assignee submits that the present Petition is necessary to preserve its rights, to avoid further extension fees and to prevent irreparable harm by the loss of valuable patent rights.

Assignee submits that the foregoing facts establish a *bona fide* attempt to comply with the

provisions of Rule 1.47, and, accordingly, request that the Assignee's Petition be granted.

Respectfully submitted,

ALEXANDER BURYAK ET AL.

**DECLARATION OF DR. IAN MANN**  
**IN SUPPORT OF RULE 1.47(a) PETITION**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

I, Dr. Ian Mann declare as follows:

1. I am the Managing Director of Bandwidth Foundry Pty Ltd., putative assignee having a proprietary interest in the above U.S. Patent Application Serial No. 10/565,691.
2. Inventor Alexander Buryak has refused to execute the Combined Declaration and Power of Attorney papers associated with U.S. Patent Application Serial No. 10/565,691, as evidenced by Mr. Buryak's email of May 19, 2006.
3. Bandwidth Foundry Pty Ltd. is a real party in interest because the subject matter of the above patent application was developed during and in the course of Mr. Buryak's employment with Bandwidth Foundry Pty Ltd.
4. The rights of Bandwidth Foundry Pty Ltd. will be irreparably damaged if this Petition under 37 C.F.R. 1.47(a) is not granted as U.S. Patent Application Serial No. 10/565,691 will become abandoned as of the expiration period set forth in the U.S. Patent & Trademark Office correspondence dated July 26, 2006.
5. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any United States patent issued thereon.

**§ 1.56 Duty to disclose information material to patentability.**

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is canceled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is canceled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- 
- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
  - (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
- (2) It refutes, or is inconsistent with, a position the applicant takes in:
  - (i) Opposing an argument of unpatentability relied on by the Office, or
  - (ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

- (1) Each inventor named in the application;
- (2) Each attorney or agent who prepares or prosecutes the application; and
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

§ 1.56 Duty to disclose information material to patentability.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is canceled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is canceled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
- (2) It refutes, or is inconsistent with, a position the applicant takes in:
  - (i) Opposing an argument of unpatentability relied on by the Office, or
  - (ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

- (1) Each inventor named in the application;
- (2) Each attorney or agent who prepares or prosecutes the application; and
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

Dear Ian,

Thank you very much for your letter regarding patent application Optical Data Career System.

Over last weekend I carefully reviewed these documents and unfortunately came to the conclusion that I cannot sign COMBINED DECLARATION AND POWER OF ATTORNEY form at this stage. I am really sorry for that, but I am worried that Optical Data Career System patent application violates IP rights of ROC

Hi Ian,

Sorry for the delay with the answer. Busy, busy, busy...  
To cut it short:

(i) Yes, I've received the documents in question

(ii) Before I sign anything I would like to talk to you  
in person (as B2B).

Unfortunately I am very busy at the moment, so later next week I'll  
suggest the time of our meeting. Does it sound ok?

Yours Truly,

Sasha.

Subject RE: Optical Data Storage IP Assignment

Hi Alex,

I wanted to make sure that you received the express post of IP assignment Deeds and to indicate when we can expect them back. Once I receive them from you I will arrange to have UNSW get Kazimir to sign.

Regards

Ian

Subject Optical Data Storage IP Assignment

Hi Alex,

I am writing to seek your agreement to execute an assignment deed for the IP that was jointly created by you, Kazimir, and Dima while you were with Bandwidth Foundry. The assignment deed has been drafted and approved by UNSW and Bandwidth Foundry and now requires the signatures of the inventors.

In brief summary, UNSW and BF have come to an agreement to jointly own the IP.

If you are happy to proceed I will mail you two hardcopies for your review and signature of which both need to be returned to Bandwidth Foundry.

Kind regards

Ian
